TARPON FIN FORM AND FUNCTION

DIRECTIONS

You have been studying fin types and their function. Using the tarpon template and the fins on this page you are going to show your knowledge. Carefully cut the fins on this page out. Place a small amount of glue on the tab located on each fin and glue them to the tarpon body where they belong. There are 5 fin types and 5 boxes surrounding the fish. Write the name of each fin in a box and write a detailed description of what that fin does for the tarpon.
